

Easy Edulab

Introducing easyEduLab

One Stop Education Management System Software for Schools/Colleges.

We offer a simple, user-friendly and affordable cloud based all-in-one education Management Software for schools, colleges and other institutions for managing administration and management activities.

Who We Are

We aim to build this education management system software to fulfil the communication gap between the school, the teachers and the parents. And also to make the schools/colleges administration and management easy and efficient, to increase their productivity and to reduce the time and their manual effort to manage academics in this digital era. So that the educational institutions can only focus on the educational aspects of the children including their performance.

What We Do

easyEduLab is an online web-based education management system software for schools, colleges and other such academic institutions for managing the administration and the management activities. It manages all the key elements of the schools/colleges including faculty (teachers), students, classes, exams, attendance, fee management, other staff, parent- school collaboration and other modules with the most user friendly interface.

Why choose us

Application

We developed this easyEduLab “Education Management Software” integrated with all the required modules of schools, colleges and other institutions, in one application, to increase their productivity, efficiency and to reduce the time and labour required to manage such academic institutes, with the most User friendly interface.

Easy to access

Use easyEduLab on your laptop, mobile or tab. It is a cloud web-based application. To use, all you need is a computer, mobile, or tablet (your preferred device) and an internet connection. There is no need for any additional IT infrastructure setup. It features a centralized storage data that helps students, teachers and parents to access the data whenever they want to . You can manage your schools/colleges anytime from anywhere.

High Availability Architecture

High availability architecture is an approach of defining the components, modules or implementation of the services of a system which ensures optimal operational performance, even at the times of high loads.

Support

We provide free of cost first time demo and 24X7 hours support to get you started by helping you import the existing students' data & other records over our multi-channel support which includes email, call facilities,WhatsApp and remote support software tools.

Pricing

easyEduLab is available on a 15- days Free Trial. We also offer the best pricing plans for different areas of schools, colleges and other institutions. You can start with the free plan and can upgrade to on-payment mode, only when found useful and appropriate for your institution.
